

POLICY AND PROCEDURE

TITLE: Credit Hour

POLICY STATEMENT:

The purpose of this policy is to provide Goodwin University's definition of a credit hour and to explain how the definition is applied in the different course modalities offered by the University. Academic credit provides the basis to measure the amount of engaged learning time expected of a typical enrolled student, not only in traditional classroom settings, but also in laboratories, internships and other experiential learning, as well as distance learning.

All Goodwin University collegiate courses are described in credit hours. A credit is a unit of academic achievement that is awarded upon successful completion of a course and is not necessarily an indicator of credit transferability. One semester credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement. This is defined, for a fifteen-week semester course, as:

- one hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks; or
- at least an equivalent amount of work as required in for other academic activities. including laboratory, internship, practical, and distance education.

Federal regulation defines a credit hour as an amount of work represented in intended learning outcomes and verified by evidence of student achievement.

A credit hour is further defined by Goodwin University as follows:

Credit Hour

- 1. <u>Didactic Traditional Classroom</u> one hour of classroom or direct faculty instruction and a minimum of two hours of out of class student work each week for approximately 15 weeks for one semester.
 - a. For an *accelerated course* a credit hour consists of a minimum of two hours of classroom or direct faculty instruction and a minimum of four hours of out-of-class student work each week.
- 2. At least an equivalent amount of work as required in (1.) of this definition for other academic activities.
 - a. <u>Laboratory</u> for example, one laboratory credit equals three hours per week of classroom laboratory instruction or two hours of classroom laboratory instruction combined with a minimum of one hour of outof-class student work.
 - b. Internship/Externship/Clinical for example, one internship/externship/clinical credit equals three hours per week in assigned workplace directed activities. If assigned workplace activities equal less than three hours per week then the course syllabi must demonstrate that the work hours plus outside work equals three hours per week per credit.
 - c. <u>Distance Education</u> for example, one credit in an online classroom must equate to at least three hours

per week of engagement in academic activities as documented in the course syllabus.

Out-of-Class Student Work – includes, but is not limited to, the following:

- Homework with specific requirements such as reading and writing assignments
- Practice and practical applications
- Laboratory research, preparation of lab reports
- Study time for exams
- Listening lab (music, foreign language practice/preparation)
- Project or equivalent learning experiences

All out-of-class student work is to be documented in the curricular materials and syllabi. An example for approximating the time required for a typical student to complete out-of-class work is explained in the procedure.

PROCEDURE DETAILS:

Goodwin University, as a recipient of Federal Title IV Funds, is subject to many federal regulations, including the federal definition of a credit hour. Goodwin University is committed to meeting the federal credit hour standards, which may include evaluating course content, delivery and the work required of all students. Federal regulation defines a credit hour for awarding financial aid and this definition is adopted in curriculum approval processes to account for the amount of work represented in intended learning outcomes and that which can be verified by evidence of student achievement. Goodwin University's policy on the Credit Hour is published in the academic course catalog and on the University website.

The process for monitoring compliance with the University's credit hour policy includes:

Procedures:

- 1. Existing syllabi reviewed by the Syllabus Subcommittee of Academic Affairs
 - a. The Syllabus Subcommittee of the Academic Affairs Committee review a random sample of current syllabi from every department annually every fall semester.
 - b. The Subcommittee reviews the syllabi for adherence to the policy requirements (See Appendix A: Credit Hour Review Guide).
 - c. If a syllabus is found to be in question, the Department Chair will be notified and requested to work with the Program Director to revise the syllabus.
 - d. The Subcommittee then reviews the syllabus a final time.
 - e. The Subcommittee Chair provides a compliance report to Academic Affairs and the Committee on Integrity.
- 2. When working with instructional designers, faculty will also tabulate the course activities (synchronous and asynchronous) with a standard that reflects various pedagogical purposes and expected level of learning.

PUBLISH POLICY STATEMENT (CLICK ON BOX NEXT TO OPTION-SELECT ALL THAT APPLY):						
☑ University Catalog	☐ STAFF HANDBOOK					
☐ FACULTY HANDBOOK	☐ STUDENT HANDBOOK					

DEFINITIONS:

<u>Credit hour</u> – Federal regulation defines a credit hour as an amount of work represented in intended learning outcomes and verified by evidence of student achievement.

Semester – an academic term that offers fifteen weeks of instruction and expected student engagement.

Accelerated course – A course that meets for 7 ½ weeks within one academic semester.

<u>Laboratory hours, internships, practical, studio work</u> – Instructional hours consisting of supervised student practice of a previously introduced theory/principle during which practical skills and knowledge are developed and reinforced.

APPENDIX:

APPENDIX A – CREDIT HOUR REVIEW GUIDE

APPENDIX A – CREDIT HOUR REVIEW GUIDE

The following table is based on an 'average' student. Upper-level coursework may require greater time allotments for reading and writing assignments

.

SUGGESTED OUT-OF-CLASS WORK TIME ALLOTMENTS SAMPLE #1

Reading Assignments	6 minutes per page	This accounts for reading with comprehension and taking adequate study notes. Higher level readings, such as technical materials or research articles, may require additional time due to the depth and complexity of the writing and the richness of the information and time appropriate adjustments should be made.
Writing Assignments	300 words = 90 minutes	Sufficient time needs to be allocated for students to develop their thoughts, research materials where necessary, and articulate their findings, facts, assumptions, and properly supported opinions in a manner consistent with University-level work.
Discussion Boards	5-8 students = 90 minutes per discussion board 9-12 students = 105 minutes per discussion board 13-18 students = 130 minutes per discussion board	Time needs to be allotted for students to read existing posts and then to compose a post that is unique and references course materials.

SAMPLE #2 ONLINE COURSE (BASED OFF OF A 7.5 WEEK COURSE)

Reading Assignments	4 hours per week
Multimedia Lectures and Videos	3 hours per week
Discussion Postings	5 hours per week
Practice Activities	5 hours per week
Assessment	3 hours per week
